

# Sudip Shrestha

Flutter Developer

Kathmandu, Nepal | +977 9867254064 | nwrsudeep@gmail.com | [Portfolio](#)

## PROFESSIONAL SUMMARY

Flutter Developer with 2+ years of hands-on experience building and shipping mobile apps for Android and iOS. I work mainly with Flutter, Dart, Riverpod, Bloc, Supabase, Firebase, REST APIs, push notifications, subscriptions, maps, audio playback, and clean architecture. I enjoy turning product ideas into simple, polished app experiences that are easy to use and maintain in production.

## TECHNICAL SKILLS

<b>Flutter &amp; Dart</b>	Flutter, Dart, Responsive UI, Custom Widgets, Animations, App Release Support
<b>State &amp; Architecture</b>	Riverpod, Bloc, Clean architecture, Feature-based structure, Reusable components
<b>Backend &amp; APIs</b>	Supabase, Firebase, REST APIs, Authentication, Storage, Real-time data, Push notifications
<b>Mobile Features</b>	RevenueCat Subscriptions, Google Maps, Notifications, Audio playback, In-app purchases
<b>Tools</b>	Git, GitHub, PostHog, Rive, Freezed, just_audio, HTTP, basic Java/Python/JavaScript

## EXPERIENCE

### Flutter Developer - The Algorithm Squad | 2023 - Present

- Build and maintain production Flutter apps for Android and iOS, working closely with designers, backend developers, and product owners.
- Translate product requirements into clean user flows, reusable widgets, and maintainable feature modules using Riverpod, Bloc, and clean architecture practices.
- Integrate Supabase, Firebase, REST APIs, authentication, storage, subscriptions, analytics, notifications, maps, audio playback, and media-related features.
- Improve app quality through smoother navigation, better loading states, performance fixes, release testing, and platform-specific debugging.

### Flutter Developer - Flutter Motion | Freelance | April 2024 - Present

- Work as a freelance Flutter developer on client mobile app projects, building clean, responsive, and production-ready UI for Android and iOS.
- Develop reusable Flutter widgets, feature screens, and app flows based on product requirements and client feedback.
- Support API integrations, Firebase/Supabase services, authentication, notifications, debugging, UI polish, and release preparation when required.

## PROJECTS

### MindTok - Emotional Fitness [Play Store](#) / [App Store](#)

Meditation and emotional fitness app with guided meditations, breathing flows, affirmations, journaling, reminders, progress features, subscriptions, notifications, Supabase integration, and release-ready Android/iOS support.

### Jiona - Social Media AI Agent [Play Store](#) / [App Store](#)

AI-powered social media productivity app, previously known internally as Transform The Day. Worked on business profiling flows, AI content ideas, trend and strategy screens, scheduling-related features, subscriptions, analytics events, and performance-focused UI improvements.

### BOIA STORIES [App Store](#)

Creator-focused photo and video design app for social media templates, reels, captions, stickers, fonts, exports, and AI-assisted creative tools. Worked on complex Flutter UI flows, editor-related screens, media-heavy interactions, caching, performance improvements, and iOS release support.

**SeifGuard** [Play Store](#)

Digital safety app with app and website blocking flows, usage history, lucidity checks, guardian mode, permission-heavy Android behavior, clear onboarding, trust-focused UX, and production stability for a Play Store release.

**Hikey**

Outdoor hiking companion app with trip planning, Google Maps integration, real-time location tracking, Firebase authentication, notifications, and group coordination features.

**EDUCATION**

---

Bachelor's in Computer Engineering - Nepal College of Information Technology (NCIT), Lalitpur  
+2 Science - Canvas International College, Kathmandu
